9.64

Projects

ExamifAI – AI-Based Online Examination System (Frontend + Backend)

April 2025 - June 2025

- Developed a secure online exam platform with real-time proctoring using Face API, violation tracking, and admin-controlled exam management. Includes auto-submission after repeated violations for fair assessment.
- Tech Stack: React, Vite, Node.js, Express.js, MongoDB, Tailwind CSS, Face API, Git/GitHub

Online Examination, Face API

KIRAN – Online Mentorship Program (Frontend + Backend)

June 2025 - Present

- Built a multi-role mentorship platform with separate dashboards for Students, Mentors, and Admins. Features include structured doubt resolution, study material sharing, 1:1/group meetings, and complete admin oversight.
- Tech Stack: React, Vite, Node.js, Express.js, MongoDB, Tailwind CSS, Git/GitHub.

Almost Completed, Online Mentorship

PlanIT – Event Management Platform (Frontend)

4 June 2025- 6 June 2025

- Designed a web platform for booking event services such as venues, decorations, catering, and attire, with admin-side analytics and booking management.
- Tech Stack: React, Vite, TypeScript, Tailwind CSS, Git/GitHub

Fully Functionable Frontend

CrazyOne – E-Commerce Website (Frontend)

11 May 2025-12 May 2025

- Created an online fashion store with product catalog, shopping cart, secure payments, and user authentication for a smooth shopping experience.
- Tech Stack: React, Vite, JavaScript, Tailwind CSS, Git/GitHub
