EXPERIENCE

Sub Coordinator – Pixelerate

Student Technical Council, IIT Patna

October 2025 – Present

Patna, Bihar, India

- Leading technical initiatives and coordinating team activities for Pixelerate, the design and UI/UX wing of STC IITP
- Collaborating with cross-functional teams to organize technical events and workshops for 500+ students
- Managing project timelines and deliverables to ensure successful execution of council activities

PROJECTS

STC IITP – Official IIT Patna Student Technical Council | *MERN Stack*

Sep 2025 – Oct 2025

- Architected and developed a comprehensive platform for managing 20+ technical clubs and many annual events with real-time event tracking, dynamic registration forms with OTP verification, and role-based access control for students and admins
- Implemented drag-and-drop form builder enabling admins to create custom registration forms with conditional fields, file uploads, and password protection, reducing event setup time by 60%
- Built analytics dashboard with data visualization tools providing insights on registrations, submissions, and user engagement across all council activities

TrackFlow – Habit Tracking Application | *MERN Stack, Tailwind CSS, Chart.js*

Dec 2025

- Developed full-stack habit tracking web application, enabling users to create, update, and monitor daily habits with automatic streak calculation and progress analytics
- Designed interactive dashboard with data visualization displaying completion rates, consistency scores, and performance insights to help users identify patterns and improve habit discipline
- Built responsive UI supporting both desktop and mobile devices, ensuring seamless user experience across platforms

ExamifAI – AI-Powered Online Examination System | *MongoDB, Face API, MERN*

Mar 2025 – Jun 2025

- Built proctored examination platform with face recognition authentication using Face API, ensuring identity verification before exam access and continuous monitoring during test sessions
- Implemented real-time violation tracking system monitoring tab switches, desktop changes, and fullscreen exits, with automatic exam submission after three violations to maintain exam integrity
- Developed admin control panel for exam creation, editing, and deletion, with detailed analytics on student attempts, violations, and performance metrics

CERTIFICATIONS & ACHIEVEMENTS

Hack N Tech: Successfully completed hackathon demonstrating problem-solving and rapid development skills

Full Stack Web Developer Certification: Comprehensive training in end-to-end web application development
