Education

Indian Institute of Technology, Patna

B.S. in Computer Science and Data Analytics | CGPA: 9.7/10.0

July 2024 - Aug 2027

Patna, Bihar, India

Experience

Full Stack Developer

Thrive Wellness

Feb 2026 - Present

Remote

- Develop full-stack web applications using React, Next.js, Node.js, and REST APIs, translating business requirements into production features
- Build responsive interfaces and integrate backend APIs and third-party services for dynamic application workflows
- Integrated AI-powered voice workflows and third-party services to support automated customer interactions
- Collaborate with stakeholders to implement, debug, and optimize features across the application stack

Full Stack Developer

Student Technical Council, IIT Patna

Sep 2025 - Present

Patna, India

- Developed and maintained the official STC IIT Patna platform serving 20+ technical clubs, 12+ annual events, and 500+ student registrations
- Engineered REST APIs with Node.js, Express.js, JWT authentication, and role-based access control (RBAC)
- Built administrative workflows for event management, registrations, submissions, and dynamic forms
- Optimized MongoDB queries and implemented Redis caching to improve API responsiveness

Projects

PodSnap - AI Podcast-to-Shorts Platform

Next.js, TypeScript, Python, WhisperX, Gemini, FFmpeg, AWS S3, Modal, Stripe

Jun 2026

- Built an AI-powered SaaS platform automating podcast-to-short-form video generation, reducing manual editing effort by 10+ hours per podcast
- Architected a video-processing pipeline using WhisperX transcription, Gemini-based content analysis, active speaker detection, and FFmpeg 9:16 rendering
- Implemented AWS S3 pre-signed URLs for secure direct media uploads and deployed GPU workloads on Modal Serverless
- Integrated Stripe payments with a credit-based monetization system

CVPilot - LLM-Powered Resume Intelligence Platform

Next.js, TypeScript, PostgreSQL, Prisma, LangGraph

2026

- Built an AI-powered resume platform for resume generation, analysis, and ATS optimization using structured LLM workflows
- Designed multi-step LangGraph workflows for resume analysis, content generation, evaluation, and structured outputs
- Developed full-stack data workflows using Next.js, TypeScript, Prisma, and PostgreSQL

ExamifAI - AI-Powered Online Examination System

MERN Stack, Face API, JWT

Mar 2025 - Jun 2025

- Built a proctored examination platform with Face API-based identity verification and continuous monitoring
- Implemented real-time violation detection for tab switching and fullscreen exits with automatic submission after three violations
- Developed an admin dashboard for exam management, analytics, and student attempt tracking

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, SQL, Java
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, JWT, RBAC, Authentication
- **Databases:** PostgreSQL, MongoDB, Redis, Prisma, Mongoose
- **Cloud:** AWS S3, Modal, Vercel, Render
- **AI & Media:** LangGraph, Gemini, WhisperX, FFmpeg, LLM Applications
- **Tools:** Git, GitHub, Postman
